Rotary tables

Series TSD...M

Light und stable rotary table with high accuracy and resolution, proven with measuring and testing applications in spectrometers, in institutes and assembly lines.

Load capacity: See „Load rating“ in the table. Calculation of load and lifetime can be made by means of the enclosed CD ROM.

Operating temperature: 0 to 70° C.

Mounting position: Optional

Adjustment: Antifriction bearing and precision worm gear are adjusted without clearance.

Limit switches: Inductive. Attached to the table in separate sensor housing. Adjustable control cams at the rotary plate.

Motors: Standard 3 phase stepping motors, make SIG, any other motors on request.
Rotary tables

Series TSD...S

Compact and stable rotary table protected against water splashes.
High load capacity perfectly suited for light handling and assembly.
